

PulseDeck Live — Notes for Certification

Publisher: Ruavira Collective Inc. · Contact: support@ruavira.org

Overview

PulseDeck Live is a content add-in that displays the presenter's live PulseDeck stage (slides, live polls, word clouds, quiz leaderboard, audience Q&A) inside a PowerPoint slide. **No account or sign-in is required at any point** — for the presenter or the audience. The add-in communicates only with pulsedeck-live.netlify.app, reads nothing from the user's document, and stores only the pasted stage link (locally).

A standing validation session is provided below and will remain live for the duration of the review.

How to test

1. Insert the add-in on a slide. The setup screen appears.

2. Paste this stage link and press “Show live stage”:

<https://pulsedeck-live.netlify.app/present/4d443950-216a-4349-99bb-58d7033f521f?key=dbaa2a87ea10c95316ee9e92fd485ecdf89163091bee5752>

3. The live session (join code **MY6ZG5**) renders inside the slide: slides, a join QR code, live poll results, quiz leaderboard and Q&A wall.

4. To test audience interaction, open the join page in any browser (for example on a phone) — no account needed — and submit a response; it appears in the add-in pane in real time:

<https://pulsedeck-live.netlify.app/j/MY6ZG5>

5. “Change session” (top-right of the pane) returns to the setup screen.

Notes

- The setup screen's error state can be tested by pasting any non-PulseDeck URL.
- Audience profanity filtering is always on; Q&A moderation is a presenter setting.
- Privacy policy: <https://pulsedeck-live.netlify.app/privacy> · Terms: <https://pulsedeck-live.netlify.app/terms> · Support: <https://pulsedeck-live.netlify.app/support>
- If the validation session is ever unreachable, email support@ruavira.org and we will restore it within one business day.
